DETAILED ACTION

Claims 1-18 are pending and subject to restriction requirement.

Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a method for degrading polylactic resins with actinomycetes.

Group , claim(s) 18, drawn to a preparation containing actinomycetes.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the corresponding special technical feature such as actinomycetes capable to degrade polylactic resins are known in the art, for example: see US 5,925,556 [IDS-AA] at col. 2, lines 50-51 and table 1-5.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Election

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Saccharothrix, *Streptoalloteichus*, *Kibdelosporangium*, *Lentzea*, *Actinokineospora*, *Saccharomonospora*, *Saccharopolyspora* and *Actinopolyspora*.

Art Unit:

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Saccharothrix - claim 2; *Streptoalloteichus* - claims 4 and 5, *Kibdelosporangium* - claims 6 and 7, *Lentzea* - claims 8 and 9, *Actinokineospora* - claims 10 and 11, *Saccharomonospora* - claims 12 and 13, *Saccharopolyspora* - claims 14 and 15; *Actinopolyspora* - claims 16 and 17.

The following claim(s) are generic: 1, 3 and 18.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the corresponding special technical feature such as various representatives of actinomycetes capable to degrade polylactic resins including the claimed actinomycetes such as, for example: *Saccharothrix* and *Streptoalloteichus*, are known in the art, See table 1-5 of US 5,925,556 [IDS-AA].

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vera Afremova whose telephone number is (703) 308-9351. The examiner can normally be reached on Monday to Friday from 9:00 to 5:30.

Art Unit:

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn, can be reached on (703) 308-4743. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
